

California OES Weather Threat Briefing

Wednesday, April 24, 2019
9:00 AM PST

Day 1: Moderate heat risk in the Inland Region and deserts of the Southern Region for those who are sensitive to heat. Isolated thunderstorms are possible along the Sierra.

National Weather Service
Western Region Headquarters
Regional Operations Center
Salt Lake City, UT

WEATHER KEY POINTS

04/24/19 - 04/30/19

Wednesday-Saturday

- Warm conditions over the next few days will continue melting of snowpack and lead to rises in rivers and streams. No significant flooding impacts are expected at this time.
 - Much of the state will have low risk for heat impacts this week for those populations extremely sensitive to heat, especially those without effective cooling and/or adequate hydration.
 - Moderate risk for heat impacts for those who are sensitive to heat in the Inland Region and deserts of Southern Region.
- Isolated thunderstorm potential returns to the Sierra Wed-Thu.

Sunday-Tuesday

- Next chance for showers and thunderstorms will be Sunday into Monday.
 - Rainfall chances currently look highest across the southern half of the state.
 - This storm could also be accompanied by gusty winds, especially in Southern Region.
- By Sunday and into early next week, a cooling trend will lead to significantly fewer impacts due to heat.
